EPICARE-ZENITH

THE BEST FOR HAIR REMOVAL

NEXT GENERATION TECHNOLOGY

DEFINING STATE-OF-THE ART, THE EPICARE-ZENITH LASER SYSTEM REPRESENTS A REVOLUTION IN NEXT-GENERATION TECHNOLOGY

INDICATIONS & SPECIFICATIONS

- Hair removal & permanent hair reduction
- Aging and mottling of the skin
- Benign pigmented lesions
- Coagulation and hemostasis of soft tissue
- Ingrown hair
- Scars, Warts, Stretch marks, Wrinkles, Podiatry
- Tattoos, Vascular lesions And Psoriasis

THE PREFERRED CHOICE FOR ALL SKIN TYPES

- 1** Treats all skin types
- 2** Best of both worlds
- 3** SmartScreen System
- 4** Multipile Spot Sizes
- 5** Faster & Better
- 6** Extra Speed
- 7** Cost Effective
- 8** Durability

SPOT SIZE

SPOT DIAMETER IN MM

SPOT DIAMETER IN CM

ALESTE COMBI

ALEXANDRITE &
LONG PULSED Nd:YAG LASER

Premium Laser For Hair Removal

Main Applications:

- Most convenient smart protocol
- Minimize pain & Side effects
- Fast treatment & Short down-time
- World best Hair removal laser
- Hair removal for all skin types
- Uniform and precise, high energy delivery

Specification

- The gas capacity for one bottle is very big (900g) comparing other products. With one bottle, 25,000 shots can be possible in 4ms case. Also, it can be refilled within limited numbers.
- Optimized automatic temperature controlling system. Temperature of water can be adjusted automatically.
- Spot sizes can be divided very narrowly. It can make user be very convenient for treatment.
- Auto calibrating system will be equipped
- Easier replacement for water and filter with one-touch

Features

Laser beam is transferred through fiber to the wanted area precisely without energy loss. So, it is very convenient to use and the treatment time can be quite shorten. Cryo Air Cooling system is installed. So, it can treat patients without pain and also, downtime can be sharply shorten.

Mōtus AX

DEKA

The Real Revolution in the
Universe of Laser Hair Removal

Available Source:

- Alexandrite Laser

Main Applications:

- Hair Removal
- Pigmented Lesions

Motus AX is a fast, reliable, safe and painless hair removal system for all skin and hair types. Thanks to the new proprietary MOVEO handpiece, Motus AX represent a new concept in hair removal.

Q10

Nd:YAG Q Switch

The best choice for skin care

Available Sources:

- Q-switched Nd:YAG laser

Main Applications:

- Tattoo, freckles, pigmentation, wrinkles, acne removal
- Carbon peel
- Skin whitening
- Vascular lesions removal

Features:

- Effective to remove Tattoo
- Uni-Q Mode is very useful for the operators
- Less Pain
- Effective

CRYO-ZET

Air cooling System

New revolution !!!

The most powerful Air Cooling System

Special Features

01 Air flow controlling system

02 Auto adjustable controlling system

03 Cooling air temperature (Max. - 35 degree)

04 Quick cooling with high quality compressor

05 Auto detecting system to keep best condition

Smoke Evacuator (DS-2000EN)

Perfect elimination of smoke and smell happened while laser operation

The specifications of Evacuator

01 Evacuating smoke and smell with low-noise

02 Adjustable suction power according to the quantities of smoke

03 3 layer's filter to be used max. 1000 hours

Pre-filter

Carbon filter

Hepa filter

Smaxel

CO2 Laser

Fractional, Surgical, Vaginal And
Dental Mode

Available Source:

- CO2 Laser

Main Applications:

- Skin resurfacing & tightening
- Acne Scars
- Large pore
- Skin Surgery
- Monalisa Touch
- Vaginal tightening
- Stretch mark

Features:

- Effective
- No side effects
- Smart protocol

ERICA

**Fractional Long & Short
Pulsed Er:YAG(2940nm)**

The ERICA laser provides powerful results for treatment of epidermal skin lesions, various scars, fine lines and wrinkles.

The ERICA comes with two modes: the short pulsed mode for ablation and the long pulsed mode for remodeling.

HIPRO-V

Fixed cartridge

No need additional cartridge

Available Source:

- High-Intensity Focused Ultrasound (HIFU)

Main Applications:

- Skin Tightening and Rejuvenation
- Non-Invasive Lifting for Face
- Body Contouring and Tightening

Features:

- The shortest treatment time among its kind
- No downtime and immediate return to normal life
- Less pain than other HIFU machine

Strengths of HIPRO-V:

- New technology
- Fixed Cartridge, no need change cartridge
- Many depth size in fixed cartridge:
Face (1.5 - 2 - 2.5 - 3 - 3.5 - 4 - 4.5)
Body (6 - 7 - 8 - 9 - 10 - 11 - 12 - 13)

WORLD GATE
Medical & Lab. Supplies

Features

- Ablation
- non-invasive surgery
- Wrinkle Treatment
- Time Saving
- Transdermal Drug Delivery
- Sterilization
- Toning Effect
- Skin Regeneration

Plasma bt

- Kills the germs and bacteria
- Tightens the aged skin
- dramatically increase the skin absorption rate

ENDOLIFT

LASEMAR 1500

ENDOLIFT™* is a new procedure of laser interstitial lifting, which takes advantage of small fibers inserted without incisions in order to obtain a lifting and immediately visible skin tightening, which are long-lasting.

LASER ASSISTED LIPOLYSIS

LASEMaR® 1500 is a fast and efficient laser for fat emulsion, skin tightening and contouring. It can be operated on face, neck, cheeks, abdomen, inner thighs, hips, gluteus, knees, arms and in all the fibrotic skins altered by ageing or by a previous operation of classic liposculpture. The results are already evident from the first treatment, but the optimal outcome will be reached after some months. It is possible a quick reabsorption of potential edemas, contusions and post intervention hematomas using the Multi Therapy handpiece, thanks to its antalgic and photobiomodulating action.

ADVANTAGES

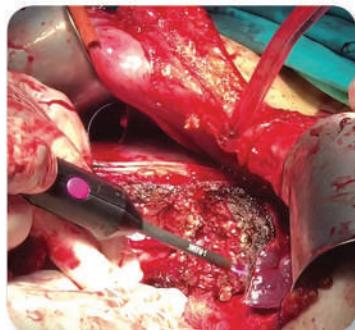

- Local anesthesia only
- Absence of incisions thanks to the micro cannulas
- The speed of the treatment is due to the immediate fat emulsion
- Limited thermal damage of neighboring tissues
- Different sterile kits for body areas
- Rapid recovery of social and working activities
- Visible results after one session
- The device can be used both with frontal and radial fibers. Moreover, the radial emission permits a wider and even heat emission and distribution, which is a positive outcome for temperature control capabilities.

J-PLASMA

The Power of Three . The Simplicity of One
finally, an energy device that you don't have to set down

J-Plasma is an advanced energy modality which combines the unique properties of helium plasma with a proprietary RF waveform. Helium plasma focuses RF energy for greater control of tissue effect, enabling a high level of precision and virtually eliminating unintended tissue trauma. These properties may allow surgeons to use the energy on and around sensitive structures

Wide Applicability Across Surgical Specialties

General Surgery

Solid organ resection
Fulgeration of target tissue
Tissue plane dissection

GYN/Surgical Oncology

Lymphadenectomy
Tumor debulking
Dysplasia

Gynecology

Endometriosis
Adhesiolysis
Condyloma

Ovarian Cyst
Colpotomy

Cardiac and Thoracic Surgery

Urology

Colorectal Surgery

LipoSurg

The Lipo Cart is a complete and powerful Liposuction cart for tumescent assisted lipo-suction.

The Lipo Cart unites all high-quality equipment with simple and easy operation at highest flexibility.

Power Infiltration

Power Liposuction

Vacuum

Lipo Cart

Complete Liposuction system

The Lipo Cart represents our fine solution as a complete power assisted system for Liposuction.

LipoSurg

Vibration liposuction with power tumescent infiltration

Vacuson 60

High performance vacuum pump, ideal for liposuction

400 ml/min infiltration

up to 4200 strokes

Power Liposuction

60L/min

Liposuction cannulas

High quality finished, cell friendly soft tissue cannulas from non-aggressive sculpting and extraction up to aggressive cannulas for large extraction volume. Especially designed cannulas for the use of tumescent local anesthesia power liposuction technique.

ORCHESTRA Cool

Cryolipolysis system

- Four different sizes handpieces optional, easy treatment for whole body**
- Four handpieces working simultaneously, save staff cost, save treatment time.**
- Unique double chin treatment handpiece, lead the latest technology in the world.**
- Non-surgery, no risk, easily intelligentize and humanization operation.**
- No need recovery, no downtime, come back to work immediately.**
- Variety accessories for multi-functional treatment**
- Super strong cooling system, ensure the minimum treatment temperature reduce to -15**
- Easy operation for all program**
- Luxury design**

Ashley

New Ashley is promising technique
for the treatment of dermis area

Main Applications:

- Wrinkle Reduction
- Skin Tightening
- Skin Rejuvenation
- Pore Reduction
- Acne Scar
- Surgery Scar
- Stretch Marks

Features:

- Sophisticated and fast treatment of convenience Treatment depth is allowed to adjust from 0.5mm to 4.0mm in 0.1mm.
- Precise treatment: Designed to be adjustable power in detail by stage 1~50(Low to high power) and enables you to obtain the convenience of various treatment.
- Total facial care system: Beam by the direct treatment of dermis with a true beam is new technology which can treat for your desired target and depth of dermis, unlike laser that impairs the dermis.
- Various indications and excellent effect Insulation of top part contacting on epidermis of needle inserted into the epidermis can give an accurate thermal damage on the practitioner's desired treatment area and so can produce collagen through wound healing process in the dermis without giving thermal damage to epidermis.
- Shot counter feature: Convenient operation system to predict the post-operation after treatment.
- Minimize pain for treatment and no down time Minimizes the diameter of needle and shortens RF irradiation time that damages dermis epochally resulting in remarkably relieving pain of the patient and returning to daily life on the same day after treatment.

Marvelous skin lifting and rejuvenation technology

Main Applications:

- Acne scar
- Surgery scar
- Stretch marks
- Pore reduction
- Skin tightening
- Skin rejuvenation
- Wrinkles reduction

Features:

- Gold Coating
 - Needle is durable and also has high biocompatibility by applying Gold Coating.
 - Patient with metal allergy could also use it with not concerning contact dermatitis.
- Stepping Motor
 - Different to existing solenoid type, the needle inserts to the skin smoothly with no shock, and causes lesser bleeding and pain after the operation.
- Dual Mode Selection (CW / PULSE)
 - CW (Ablation treatment)
 - PULSE (Non Ablation treatment)
- Dual Actions
 - Needle RF - Thermal Treatment
 - Needle Iontophoresis
- Insulation Needle
 - To protect epidermis layer's Side effect
- Selectively heating transmission

HRZ-6000 Diode Laser

Powerful & Perfect
Permanent Hair Removal

Features:

- It is easy to change water
- Diode module is safe installation
- The cooling ability improves by using a compressor
- The cooling ability improves by using a compressor
- Powerful motors which is cooling rapidly

why HRZ-6000?

HRZ-6000 is very effective Diode Laser for removing hair, which can remove all types of hair at any part of human body in short time

Main Features:

- Safe and comfort treatment
- Excellent cooling system (up to 1°C)
- Satisfactory performance
- Easy and fast treatment

9in1 Hydrafacial

- .Fine Line and Wrinkles
- .Elasticity and Firmness
- .Skin Texture
- .Oily and Congested Skin
- .Enlarged Pores
- .Advance signs of aging Fine

MED-JET

REINVENTING THE ART
& SCIENCE OF INJECTION

CUTTING EDGE

LEADING INNOVATION IN NEEDLE FREE
FOR OVER 20 YEARS, THE MED-JET IS THE
MOST ADVANCED INJECTION SYSTEM

ENHANCED SAFETY

NO CHANCE OF NEEDLE STICK INJURY
MEANS INCREASED USER & PATIENT SAFETY

INCREASED SPEED & ACCURACY

IN EXCESS OF 600 INJECTION HOUR AND
DOSE ACCURACIES EXCEEDING REQUIREMENTS
OF ISO 21649:2006

WIDE RANGE OF DOSAGE

DOSAGES AS SMALL AS 0.02 mL UP TO
1 mL ARE POSSIBLE (MODEL SPECIFIC)

INCREASED COMFORT AND PEACE OF MIND

THE JET IS 6 TIMES SMALLER THAN A 30 GAUGE
NEEDLE AND THE ABSENCE OF A NEEDLE LETS
PATIENT BE AT EASE
