

HIPRO-V

Forehead wrinkle lifting

Nasolabial fold

Wrinkle around the eyes

Neck Wrinkle

Abdomen

Arm

Thigh

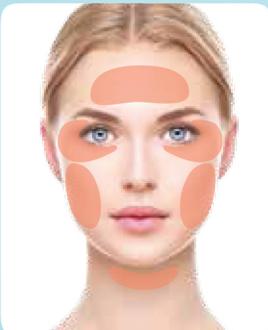

Back

HIPRO-V

What is HIPRO-V?

With only one handpiece without the additional cartridges, HIPRO-V delivers HIFU energy to SMAS layer which is located between subcutaneous tissues and muscle, or deep dermis, or the fat layers in body. And then, makes 0.7mm ~ 1.0mm size of TCP (Thermal Coagulation Points) zone makes SMAS contraction, or resolves the fat without surgery, or skin surface damage.

Treatments by HIPRO-V (Face & Body)

- Forehead wrinkle lifting
- Nasolabial fold
- Wrinkle around the eyes
- Neck Wrinkle

- Abdomen
- Arm
- Thigh
- Back

Products GUI

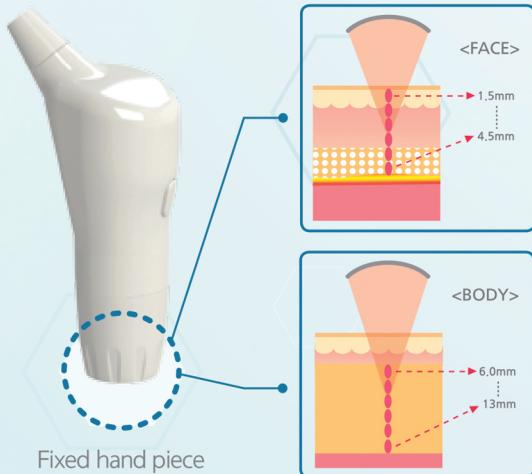

Fixed hand piece

No need Additional cartridge

Hipro-V with only ONE handpiece
High Intensity Focused Ultrasonic
For face Lifting & Tightening
& Body contouring

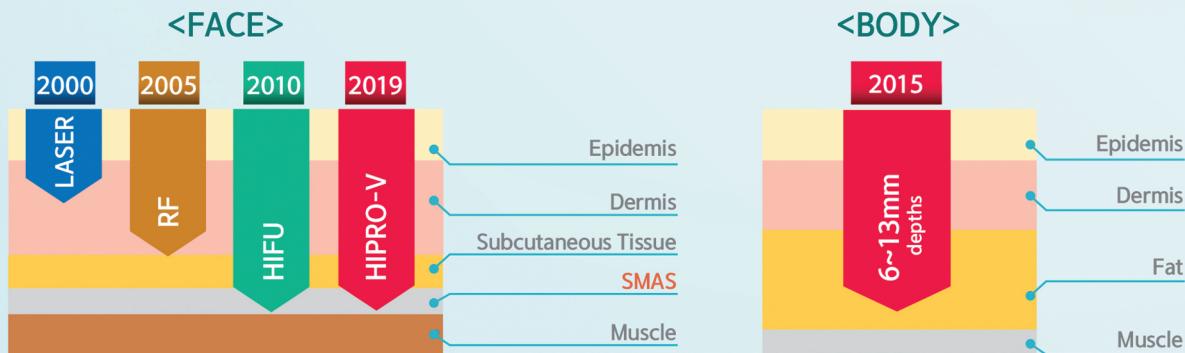

Characteristics of HIPRO-V

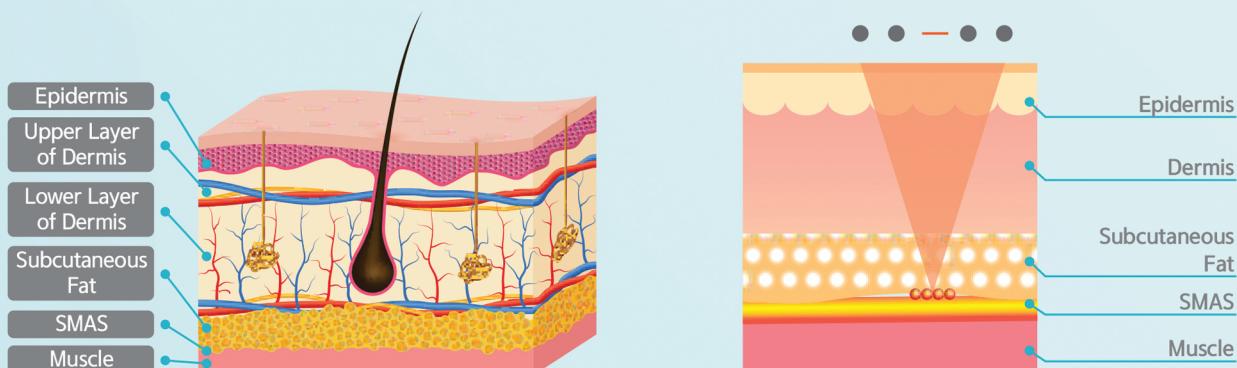

- KFDA approval as total face lifting, tightening & body slimming
- The shortest treatment time
- No down time and immediate returning back to normal life
- Reasonable price of consumables
- Compact & Portable size

History of Skin Lifting

HIFU system is used to make the thermal coagulation to SMAS layer or deep dermis as non-invasive skin lifting and tightening treatment. Now, HIFU system is developed to area of Body for slimming. HIPRO-V can make thermal coagulation to layer of fat and help to reduce fat by using principle of HIFU.

- Make over 60°C of TCP zone on SMAS layer by delivering HIFU energy.
- By wound healing process on TCP zone of deep dermis, re growth of collagen and elastin are stimulated.
- Skin lifting and tightening occurs by collagen regeneration process of dermis and the contraction of SMAS layer.

SPECIFICATIONS

Energy Type	HIFU (High Intensity Focused Ultrasonic)
Energy Output	0.1 ~ 2.0 [J]
Electrical	AC 100 - 230 [V], 50/60 [Hz]
Repetition Rates	5 ~ 10 [Hz]
Depth for Face	1.5 ~ 4.5 Step to 0.5 [mm]
Depth for Body	6.0 ~ 13.0 Step to 1.0 [mm]
Dimension	350 X 410 X 290 [mm] (W X D X H)
Weight	10 [kg]
